

# PULSE

FROM HUM TO HIT

# TEAM

**Joshua Lin**  
**2nd year @ UCSD**

**Lucas He**  
**Rising Sophomore @**  
**Cornell**

**Ore Adeniyi**  
**Rising Junior @**

**Have you ever had a melody stuck in your head? A melody so catchy you are sure it could be the next TikTok trend or the next club hit, if only you could add the right beats, the right production, the right lyrics.**

**But then life interrupts. The moment passes. And the question hits you:**

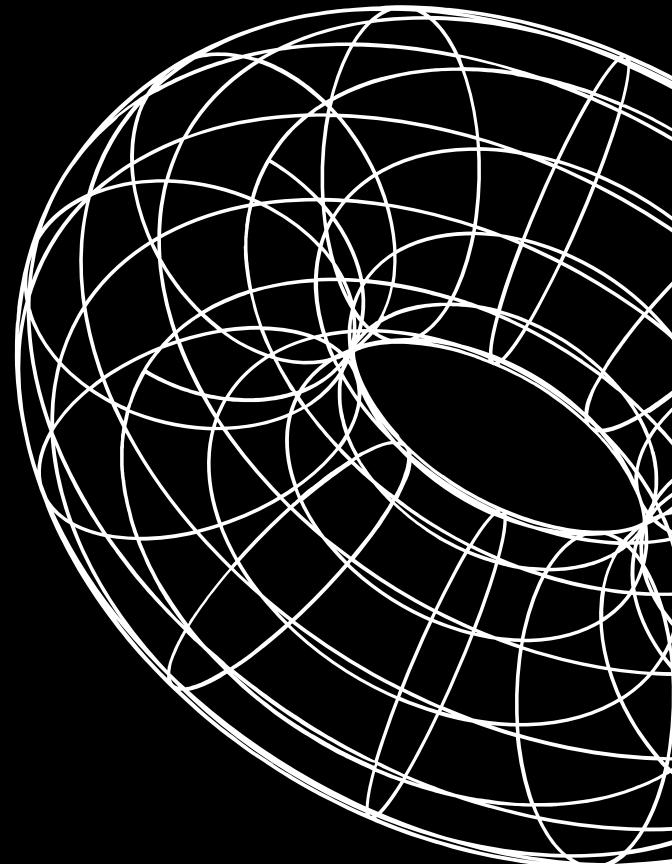

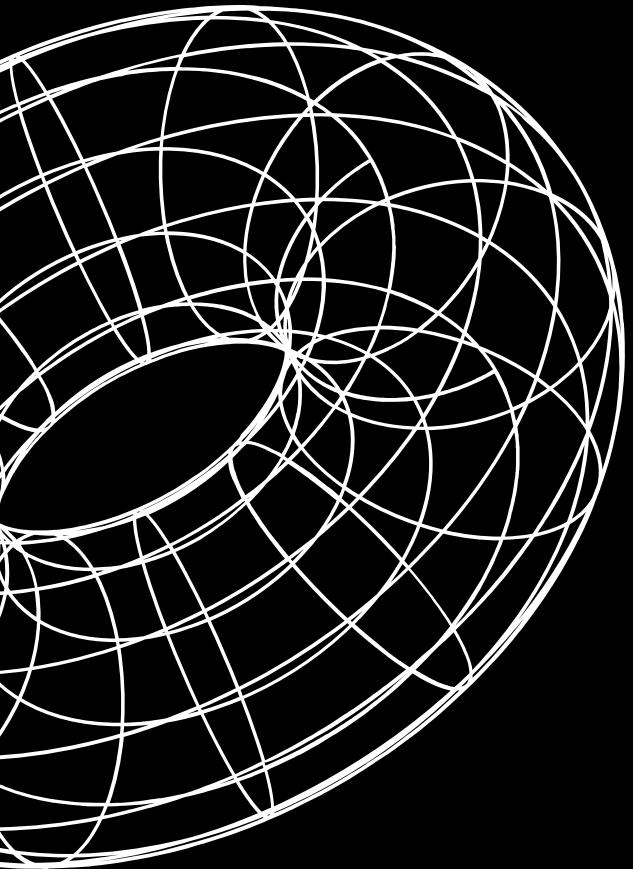

**...What was that melody again?**

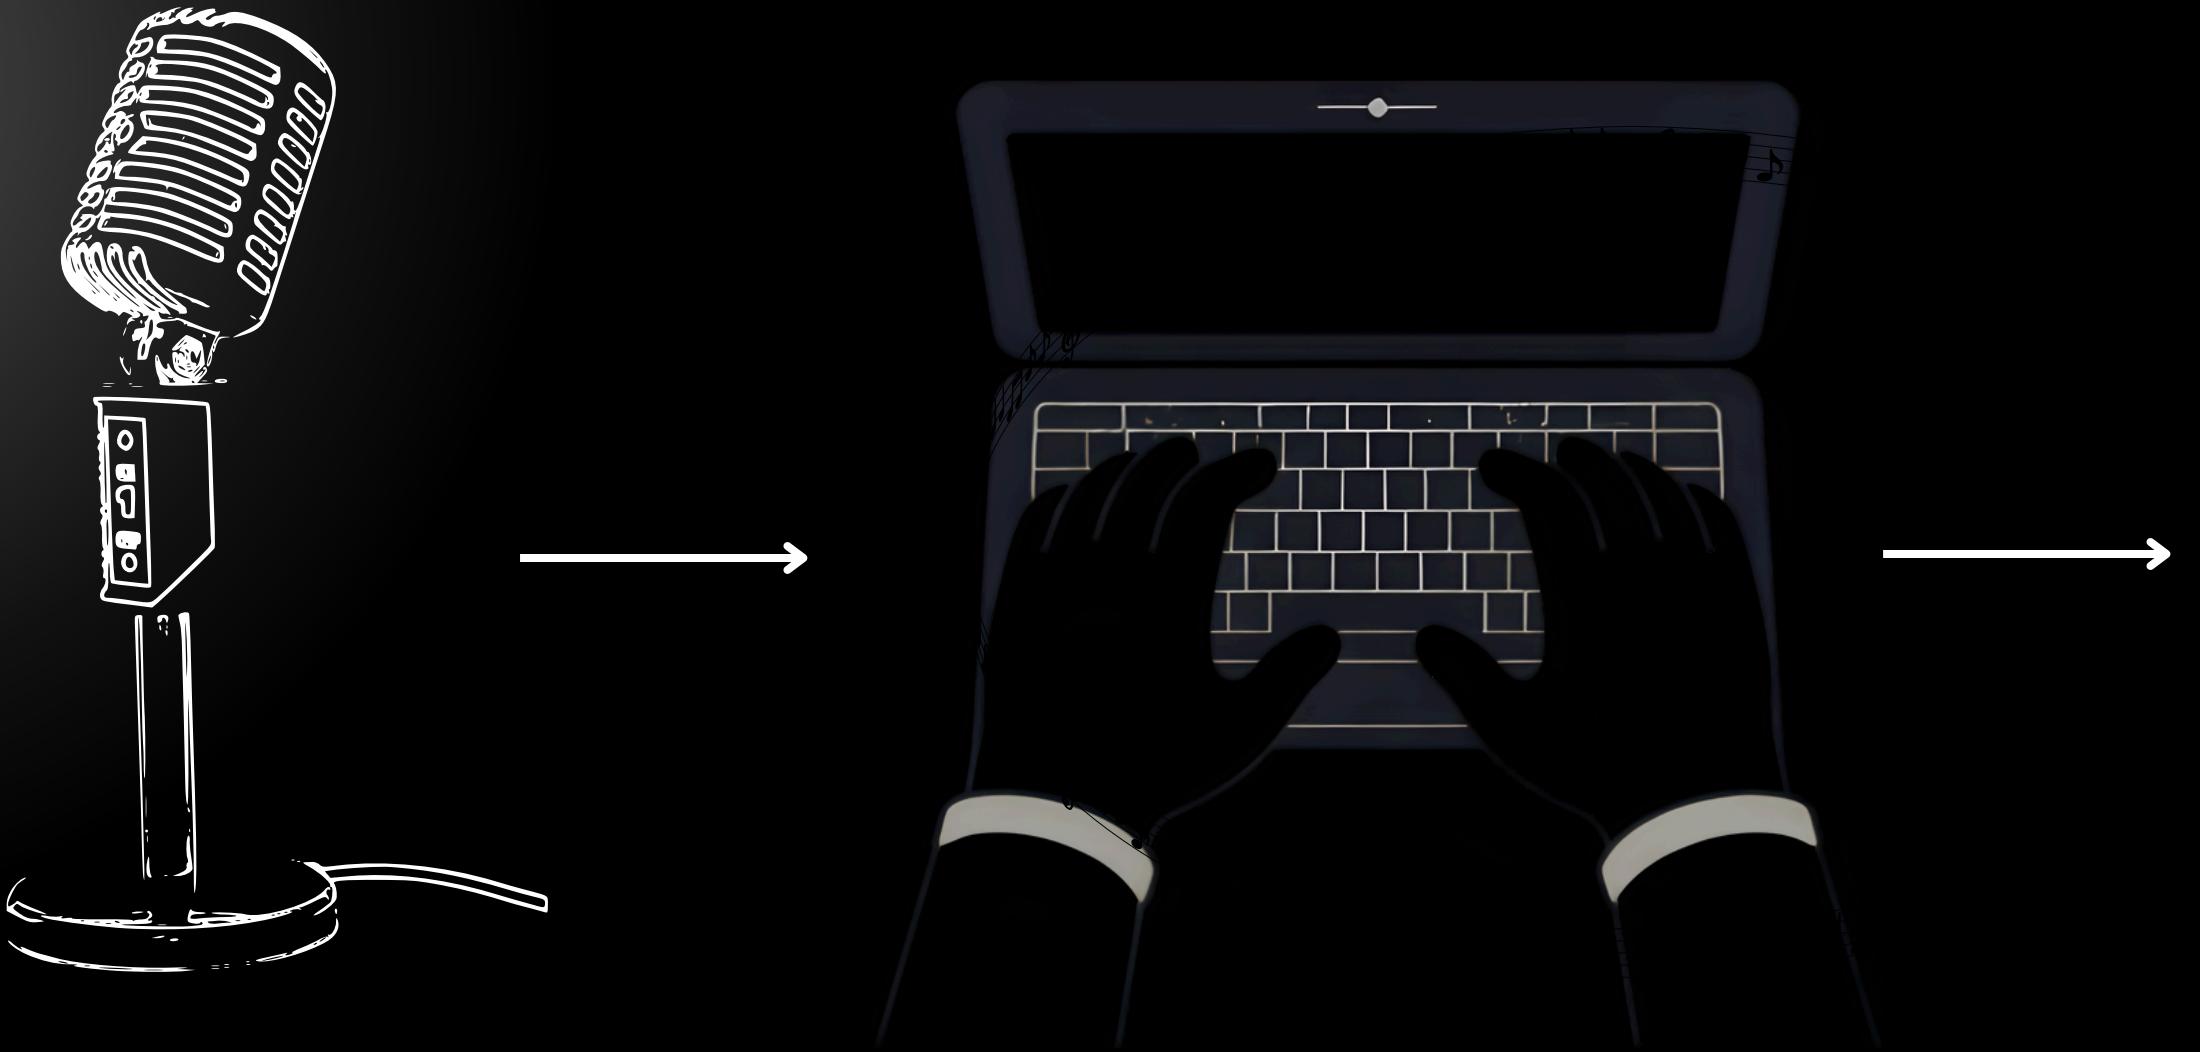

**We refuse on letting your next hit vanish into thin air.  
We turn your fleeting inspiration into a full, professional track in seconds.**

# HOW?

 |i'm feeling... rock| 

# Three Steps

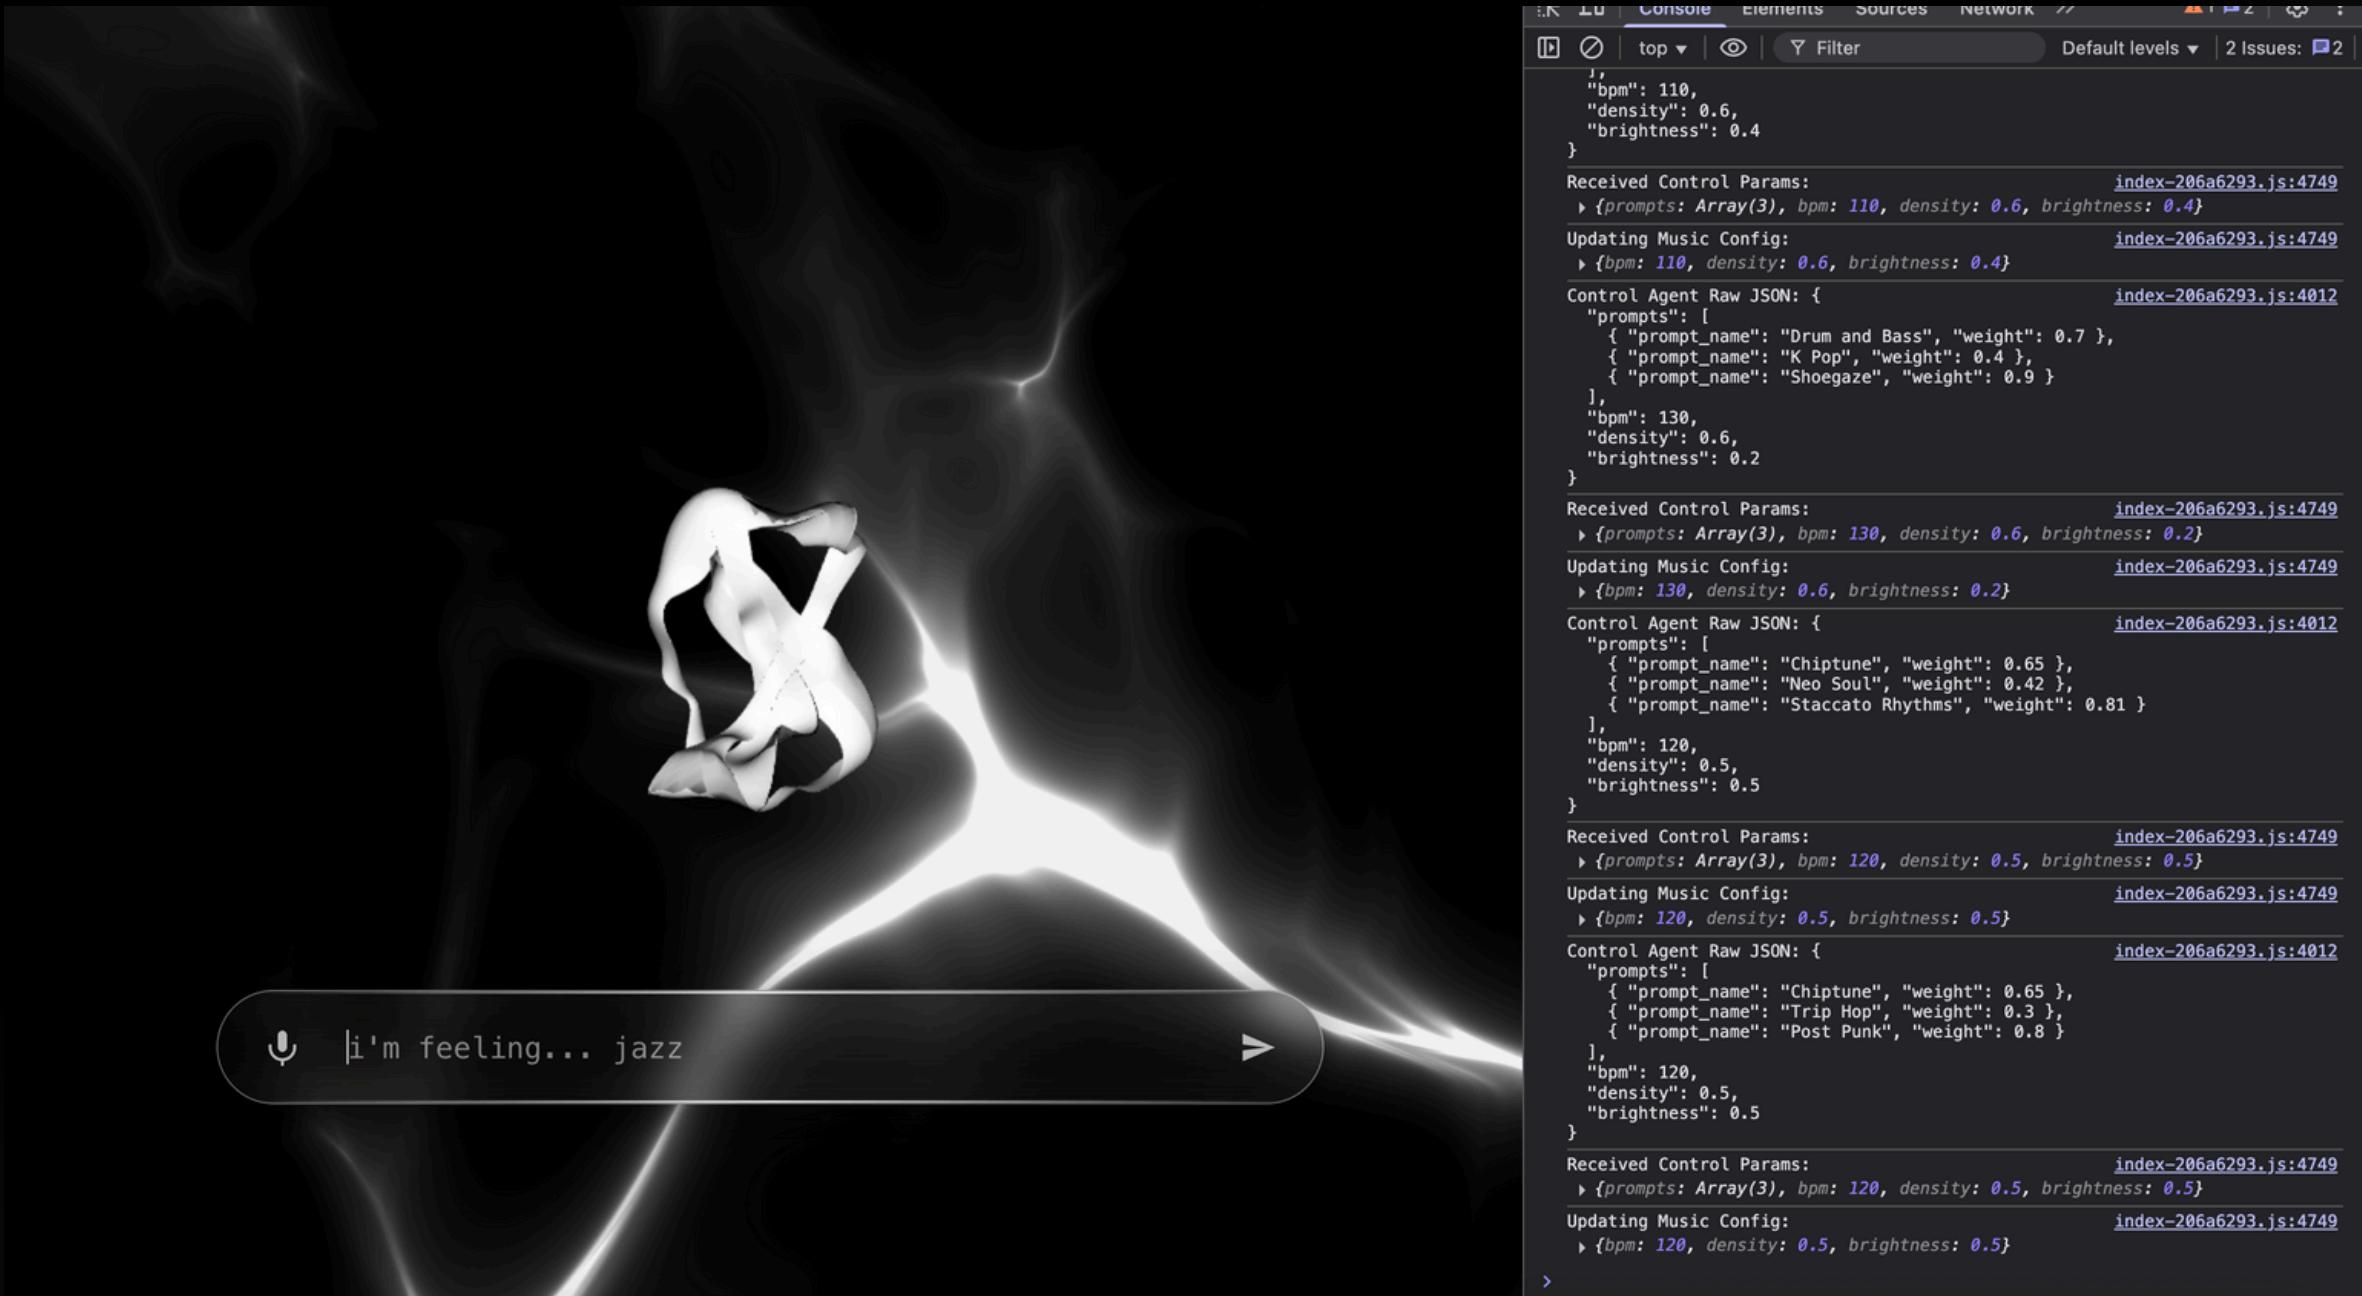

Hum, prompt, and listen!

# LIVE DEMO

AT PULSE.QTZX.DEV

# Real-Time Steering

## Why us?

People love music.  
But music is hard to  
make.

**everyone.**

# NEXT STEPS & LIMITATIONS

**User authentication and project saving,  
collaborative real-time sessions, DAW integration,  
VR/AR support for immersive creation.**

**Limitations: 3-5 second API latency from external  
services, browser-based audio quality constraints,  
no persistent storage, text-only steering interface.**
